Introduction – This lab explores the sensors included with the M5Core2, specifically the directional sensors. This lab maps out the X, Y, and Z axes, the max Acceleration, and alerts the user when there's been a significant change in acceleration, for example, a drop.

Implementation – the implementation section of your lab report should include the following:

1. BoM: M5Core2, connector cable, personal laptop, arduino.

accX, accY, accZ
-0.08 0.88 0.60
maxX, maxY, maxZ
0.10 0.97 1.05
Maximum Acc: 1.21 G

accX, accY, accZ
-0.03 0.02 1.05
maxX, maxY, maxZ
0.00 0.04 1.06
Maximum Acc: 1.06 G
